THE GLOBAL ANGEL WINGS PROJECT

Colette Miller created the Global Angel Wings Project in 2012, in the streets of Los Angeles, the City of Angels. They were painted to remind humanity that we are the angels of this earth. They are human sized interactive public art, wings that people take photos with and thus become part of the work. The first pair was just street art but the response was natural, immediate, and spontaneous – from people of all sorts and backgrounds. Colette has painted wings globally – Kenya, Australia, Taiwan, France, Cuba, Juarez Mexico, and more, and many in the USA. Though some are commissioned and others gifted, the wings themselves are free to the world, never owned by anyone, not even Colette, though they are of her provenance and her work.

BOATS + KAYAKS

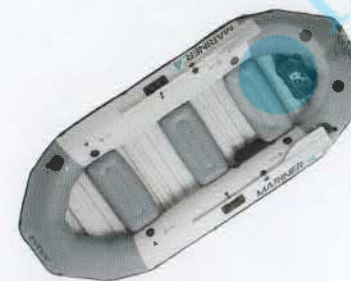

SPORT SERIES

A broad range of recreation boats and kayaks. All models are made with strong and durable materials for stability and rugged use, suited to fishing and boating in lakes and mild rivers.

SuperStrong™ enhanced molecular formulation PVC provides superior strength and durability, ensuring high impact and abrasion resistance.

PRO SERIES

Designed and engineered for optimum performance, comfort, rigidity and versatility.

SuperTough™ 3-ply laminate construction combined with SuperStrong™ enhanced molecular formulation PVC provide superior structural strength and unmatched resistance to damage from abrasion, impact and sunlight, while allowing more pressure for rigidity.

COMMITMENT TO EXCELLENCE

In today's rapidly evolving and highly competitive environment, this translates into a total commitment to product quality, including conformity to all relevant safety & quality regulations and standards. Examples include:

- EN 16927, Safety and test methods for mini pools (European standard)
- EN 16582, Safety and test methods for domestic swimming pools other than mini pools (European standard)
- Regulation (EC) No.1907/2006 "Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)"
- EN 71 "Safety of toys" (European standard)
- EN 13138 "Buoyant aids for swimming instruction" (European standard)
- EN ISO 25649 "Floating leisure articles for use on and in the water" (European/ International standard for air mats, lounges and other similar items)
- EN 60335-2-41 "Safety of household and similar electrical appliances, particular requirements for pumps" (European standard for water pumps)
- EN 60335-2-60 "Safety of household and similar electrical appliances, particular requirements for whirlpool baths and whirlpool spas" (European standard for portable SPA)
- ISO 6185-1 "Inflatable boats" (International standard for Sports Boats)
- NMMA-ABYC (USA standard for hi-end sports boats)
- ASTM F963 "Standard Consumer Safety Specification for Toy Safety" (USA toy standard)

- ANSI/APSP-4 "AGP standard" (USA standard for above ground pools)
- CPSIA "Consumer Product Safety Improvement Act" (USA regulation of consumer and children's products)
- ASTM F2666 "Small pools standard" (USA standard for pools under 36" water depth)
- UL1450 "Electric inflators" (USA standard for electric inflators)
- UL1081 "Swimming pool pumps, filters and chlorinators" (USA standard)
- UL1563 "Electric spas" (USA standard for Spa)

Intex's commitment to excellence extends to helping our environment and supporting the ecosystem. It begins with product design. Intex's filter pumps operate on much lower amps than most filter pumps in the market, reducing electricity consumption. Our saltwater systems clean pools using only natural salt, eliminating the ongoing need for environmentally unfriendly packaged chlorine.

Intex also operates one of the most comprehensive recycling program in the industry. We are one of the earliest companies in China to successfully obtain a license to ship consumer's returns in the original package back to China to be recycled. Our manufacturing waste repurposing program prevents used materials and scraps from going to landfills and instead they are re-used in the manufacturing process where up to 10% of annually produced PVC is recycled.

Intex designs all of our own packaging for our products. We constantly challenge our methods of packaging to improve efficiency and reduce waste. More compact packaging techniques save cardboard while cutting down on space utilization, saving freight and fuel consumption. As a manufacturer, Intex knows it has a responsibility to manage the amount of waste produced. As an employer of over ten thousand people, we also encourage our own employees to recycle, reduce waste, and be conscious of the environment. Starting from recycling corners for all our worldwide office facilities, our factory has worked with the local government as well as through sponsorships with key partners to strengthen our efforts to be more eco-friendly. Intex has worked to provide incentives and seminars to employees as well as setting targets to reduce energy consumption. In addition, Intex has made significant investment in technology to achieve these goals. For example, we have implemented a frequency converter system which converts diesel to natural gas, installed solar water heaters and set up a recycled sewage system, and invested in equipment that reduces gas emissions.

From product design, to more efficient processes that save energy and reduce waste, to a world class recycling program, to more energy efficient offices, the people at Intex are striving to provide the best value products anywhere while constantly keeping our global ecosystem in mind.
